

## Results You Can See

The enCurve can help you attain a better body image, by working with your body's natural processes to eliminate fat cells.

## Questions?

### How many treatments will I need?

In order to insure the safest treatment, your doctor may require multiple sessions to produce effective, long-lasting results. The number of sessions required depends on your treatment goals. Your physician will recommend a treatment course that is right for you and will discuss the number of treatments required to meet your goals.

### Is there any downtime?

With no downtime and minimal side effects, you may immediately return to your daily activities. Ask your doctor about scheduling your enCurve procedure today.

### Does an enCurve treatment hurt?

The majority of patients report minimal pain, most only experience a slight warming of their skin.

### Can all skin types be treated?

Yes, all skin types may be treated. The treatment is color blind.

## TREATMENT TIPS

- Intake plenty of water, at least 2 liters a day starting 3 days before the treatment. Continue to maintain drinking water for several days after treatment as well, as it assists in helping your body remove fat cells.
- No electronic devices are allowed during treatment, which includes cell phones as they may interfere with the device.
- Those who have implanted electronic devices such as a cardiac pacemaker are not able to get the enCurve treatment.

YOUR CURVES

## What can enCurve do for me?

The enCurve is the easy and comfortable way to reduce fat cells through apoptosis-inducing shortwave electromagnetic hyperthermia. The optimal temperature is reached in order to cause the cell to denaturize, or break apart, so that it can be removed through your body's natural processes.

Natural results; treat entire abdomen

Conforms to your body, providing safe and effective treatments

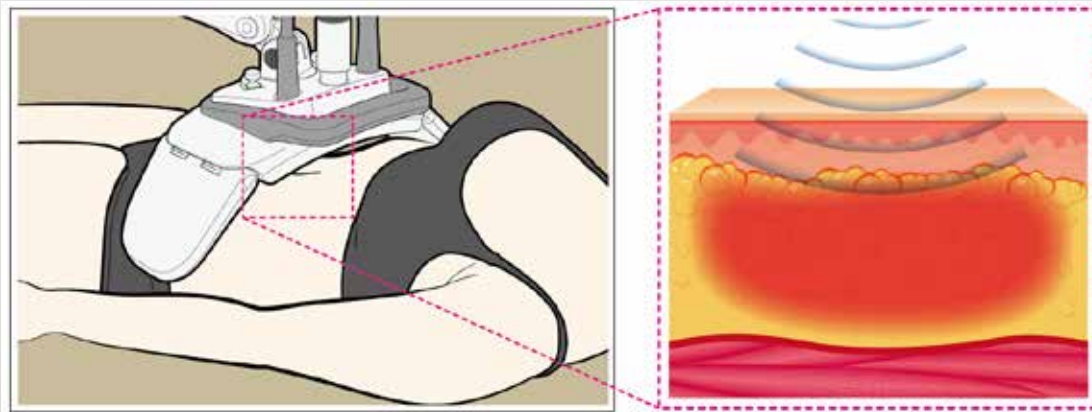

## Expect Results with enCurve

The apoptosis-inducing shortwave energy waves penetrate deep into the tissue, targeting the fat cells deep within our tissue. The body's natural removal process then takes over, removing the damaged cells, permanently removing the cells.

### WHAT TO EXPECT DURING YOUR TREATMENT

Your physician will begin treatment by placing the head over the area to be treated. After setting the parameters, your physician will start the treatment. You may feel slight warming of your skin as the energy penetrates.

### HOW ENCURVE WORKS

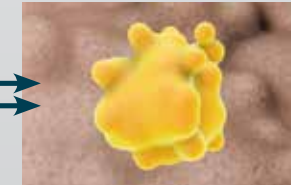

Focused energy targets fat cells.

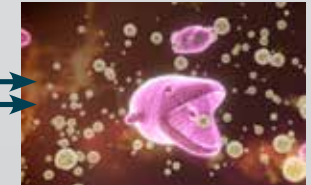

Energy from enCurve focuses on the cells

Cells vibrate rapidly creating heat.

The heat leads to the death of the cell.

The body's own natural processes remove the cells.

### THE ENCURVE ADVANTAGE

- Relaxing treatments with little-to-no pain
- Comfortable procedure poses with ergonomic articulating arm
- Treats entire abdomen and waist line for full coverage and natural looking outcomes
- Air mode to eliminate sweat on tissue for a safer treatments
- Faster treatments save time over competing devices
- Non-contact and non-invasive treatment
- No anesthesia and no downtime
- Ideal for those who don't want surgery and are non-responsive to exercise
